

PROJECTOR

PROJECTOR

INSTRUCTIONS:

1. Plug main unit into power supply and press the power button on the front.
2. Plug Blue VGA cable or HDMI cable adapter into “Computer In 1” on back of projector and into computer.
3. Plug red and white audio cables into “audio out” on back of projector and into computer or speaker system.
4. Cycle through the input options until Computer 1 comes on the screen. At this time you should see your mirrored computer screen. If not, enable extended desktop mode on the computer: Go to the Display control panel and check the box that says, “Extend My Windows Desktop Onto This Monitor” Click Apply.
5. Use the focus and zoom controls and the adjustable feet under the projector to fine tune your picture!
